Work in Progress

“Skill-Upgrading and the Saving of Immigrants”

Abstract: This paper derives positive implications about the effect of unskilled immigration on the welfare and skill-composition of the labor-force in the receiving economies. The main channels through which immigration affects labor-market outcomes are productive complementarities and the availability of new loanable funds for investment, which results in endogenous skill-upgrading. Given their high training costs and their lifelong working period, immigrants self-select as net suppliers of loanable funds, which facilitates the upgrading of both new generations of natives and migrants. Under mild productive complementarities, this induces an increase in the aggregate labor income of natives.

“Dynamics of neighbourhood formation and segregation by income”, Jointly with Osiris J. Parcero (work in progress).

Abstract: This paper analyzes some determinant conditions under which neighbourhood formation gives rise to segregation by income. In contrast to the literature, we explore the *sequential* arrival of poor and rich individuals to neighbourhoods exploited by oligopolistic land developers. These developers try to maximize a discounted flow of lot prices during neighbourhood formation, taking advantage of the local externalities generated by the rich and the poor. Under a speedy arrival of new potential inhabitants and / or low discount rates, competing developers are more likely to concentrate rich people in the same neighbourhood. This happens because the benefits from early agglomeration are outweighed by a more profitable matching of rich neighbours within nearby lots.

Honours and Awards

2004-2005	Graduate Fellowship, Department of Economics, Boston University
2004	Summer Research Award, Boston University
2003	Rosenstein-Rodan Prize, awarded by the Institute for Economic Development (Boston University) to the best graduate student’s paper on development.
1999	La Caixa Fellowship Programme
1997	Best GPA Award Class of 1997, Universidad de Alcalá de Henares.

Employment history

2014-present.	Assistant Professor at the Universidad Loyola Andalucía. Seville (Spain).
2012-2014	Research Fellow. Ural Federal University, GSEM. Ekaterinburg (Russian Federation).
2012	Visiting Professor in Micro and Macroeconomics. United Arab Emirates University, Al-Ain (UAE).
2011- 2012	Researcher, Project TRANSPORTRADE, Department of Economic Analysis, Universidad Autónoma de Madrid.
2008-2011	Instructor, Graduate Microeconomics, Economic Geography, Economic Growth, Development Economics, International Trade, ISET, Republic of Georgia.
2006-2007	Teaching Assistant, Intermediate Macroeconomics, International Economics, Advanced Microeconomics, Universidad Carlos III de Madrid
2004-2005	Teaching Assistant in Mathematics, Boston University
2002-2003	Instructor, Principles of Macro and Microeconomics, Universidad de Alcalá de Henares

1997-2002 Teaching Assistant in Statistics, Econometrics, Intermediate Macroeconomics, Economic Growth, Universidad Autónoma de Barcelona.

Professional Experience

Referee. *Journal of Economic Geography; Journal of Development Economics; Papers in Regional Science; Journal of Economic Surveys; Labour Economics; World Economy; Journal of Economics; Latin American Economic Review; Economics Bulletin.*

Master Thesis Supervisor.
