

TEACHING GUIDE ADAPTATION DOCUMENT DUE TO COVID-19 SPECIAL PERIOD TEACHING GUIDE YEAR 2019-20

This Adaptation Document specifies how the teaching of this course has been adapted (contents, methodologies and assessment) due to the period of temporary suspension of face-to-face educational activity as a result of the health crisis caused by the COVID-19.

COURSE: Fundamentals of Physics I

CODE: 350002

1. CONTENTS

No changes/adaptations have been made to this section.

2. TEACHING-LEARNING METHODOLOGY. EDUCATIONAL ACTIVITIES

Yes, some changes/adaptations have been made to this section:

In order to facilitate the online teaching of the course, the available materials have been adapted and expanded with solved exercises, in written and video formats, and other supporting documents. Likewise, the telematically taught lectures have been recorded to allow students to view them again later. The laboratory practicals of the course have been cancelled. The associated competences will be fulfilled in the Fundamentals of Physics II course.

3. ASSESSMENT: PROCEDURES, ASSESSMENT AND QUALIFICATION CRITERIA

Yes, some changes/adaptations have been made to this section:

The cancellation of the laboratory practicals, accounting for 20 % of the mark in the ordinary call, has demanded the reorganization of the evaluation elements in the ordinary call. Two partial tests (PEI1 and PEI2) will be held during the teaching period, each of them with a weight of 50 % in the final mark. The evaluation of the contents of test PEI1 and/or test PEI2 can be taken again on the date set for the ordinary call exam (PEF). The student choosing to re-sit the evaluation during the PEF renounces the mark obtained in the first evaluation.

The subject will be passed with a score equal to or greater than 5 over 10 in the average of the two partial tests, a minimum grade not being required in any of them separately. Students following the final evaluation regime will take a final exam consisting in sitting the two partial

tests on the date scheduled for the PEF. Students who take none of the tests in the ordinary call exam, and have not attained an average of 5 over 10 in the previous partial tests, will not be graded. In the ordinary call, students having a previous mark in the laboratory practicals may keep it upon request through the procedure designed to that purpose. In such a case, the laboratory mark will account for 20 % of the final grade, whereas the partial tests will each have a weight of 40 %. For students following the course under the final evaluation regime, the weight of the laboratory mark in the final grade will be 20 %, the remaining 80 % corresponding to the PEF test. The subject will be passed with a score of 5 over 10 in the weighted average of the said elements. In the extraordinary call, 100 % of the mark will be given by the extraordinary call exam (PCE).
